My Kiln Firing

Materials

Glaze: Celadon (Green)

Clay Body: Standard Stoneware

Firing Temperature: 1222°C

Kiln Results

Maturity: 91.9%

Surface Quality: glossy

Clay Shrinkage: 11.0%

Final Glaze Color: #a4c381

Notes

This recipe was generated using ceramic chemistry simulation. The maturity calculation is based on silica-alumina-flux ratios and firing temperature. Always test fire a small sample before committing to a full kiln load.
